When it comes to feed and seed, **grow local.**

Your local source for success.

Central Wisconsin dairy and livestock producers know ProVision Partners Cooperative for our unparalleled feed expertise. We're also your local partner for seed corn, soybean seed, other seeds, various crop protection treatments, along with input advice to help you make the most of your output at harvest.

Performance is always our priority.

We partner with Purina Animal Nutrition to offer our customers feed options to maximize the performance of their dairy, beef, poultry, show animals and more. The same is true with our seed, input and agronomy product offerings. Because in agriculture performance equals profitability.

Bottom line: We want to be a trusted partner when it comes to all aspects of your operation.

Convenience equals value.

ProVision Partners Cooperative offers feed, bulk seed, fertilizer and many other products vital to your success. Many products we'll even deliver up to an 80-mile radius from our central Wisconsin locations saving you time and money, not to mention valuable time away from your operation.
