Whether you are a veteran of the fish world or want to start but don't know how. We've got answers to help you navigate the waters.

A healthy pond is half the battle for a successful fishpond. It may be easier than you think. Jim can help you get your pond fish friendly and teach you what you'll need to keep it that way.

You will also learn how to properly feed the food chain. How to grow larger, healthier fish.

Harvesting may be necessary to maintain balance. We'll discuss how. Plus, much more.

Please join us on May 10, at noon for this valuable informational seminar. Call 715-387-1045 with questions, and to RSVP.
